

The ORIGINAL TURBINE
Est. 1945

NEW CYCLONE PTO

FOR OVER 63 YEARS Buffalo Turbine products have been engineered and manufactured to be durable, lightweight, easy to operate and service. The unique Turbine Design provides superior performance and satisfaction which equates to a faster return on your investment.

The NEW Cyclone PTO, like all Buffalo Turbine blowers begins with a lightweight, rigid, welded, tubular steel frame. This redesigned PTO unit incorporates cutting edge technology by using a direct drive gearbox in place of belts, pulleys, jackshafts and pillow blocks resulting in the lightest, most powerful, PTO driven, turbine styled debris blower available.
